

# Stay Connected... for Life.

*"Telehealth users have noticed greater efficiency, better utilization of their human resources, happier patients, and better quality of care."*

Joseph C. Kvedar, M.D.  
Director of  
Partners Telemedicine  
Past President of  
American Telemedicine  
Association

## Real-time video consultations between patients at home and their caregivers

*TelePal*™ videoconferencing consultations make it easy for children with life-threatening or life-limiting diagnoses to stay connected with their physicians, nurses, social workers, counselors, and other caregivers without unnecessary travel.

An innovative telemedicine technology, *TelePal*™ enables real-time patient monitoring and family/medical team interaction through a secure video connection.

Designed to supplement, not substitute for, personal caregiver interactions, *TelePal*™ makes it possible for a fast consultation when the patient experiences a change in condition.

Not only is *TelePal*™ one of the fastest, most efficient ways to link patients with caregivers, but it is also cost-effective and provides patient families with the confidence, hope, and peace of mind they need 24 hours a day, 7 days a week.

*TelePal*™ is a trademark of the Liam Lawson Foundation and is now available through the Lancaster office of Bayada Nurses.
